## *Putnam County Agriculture*

Agriculture in Putnam County is a diverse, multimillion dollar industry and a crucial land use that strengthens our local food supply, economic vitality, quality of life, community character, picturesque landscape, environment, and recreational opportunities. Top agricultural and farming activities in the County include equine and livestock operations, greenhouses, nurseries, orchards, maple syrup, hay and corn production. There are approximately 11,309 farmland acres in Putnam County with farm sizes ranging from 1.25 acres to 1,200 acres.

These lands are under intense pressure and at great risk of being converted to non-agricultural development. Thoughtful, decisive action is needed now to preserve the remaining farms and agriculture in Putnam County.

The existing certified Agricultural District, the Putnam County Agricultural and Farmland Protection Board and the Putnam County Soil and Water Conservation District provide a basis for further protection and enhancement of agriculture in Putnam County.

*A farm is lost to development every three days in New York*
